

Official Centers and Institutes at UGA

Official Centers and Institutes are ones that have been proposed and approved through the University Council and Board of Regents policies cited below.

Use of the words “center” and “institute” denotes very specific meaning:

A **center** provides an organizational base for research and a structure for extramural funding. A center is not an autonomous structure and is not involved in independently offering credit courses or degree programs.

An **institute** shares a center’s focus but has a more formalized structure, may be an autonomous unit, and will offer credit courses and possibly degree programs.
