## Social Determinants of Inequalities of Health

Maymester  
Course

### May 12-June 2

Students are exposed to multiple levels of influence on health and health inequities. The course encourages students to consider how disparities and inequities in health challenge population health and the health care systems that are in place to address them.

**By the end of the course you will be able to:**

- Explain the difference between health disparities and inequalities
  - Discuss the most common social Determinants of health in the U.S.
- Understand key theories and debates related to health disparities and inequalities
  - Describe interventions that target social determinants of health behaviors and disease
