

**Statement of Interest
Department of Environmental Health Science**

Name _____ Social Security # _____

Telephone _____

Mailing Address _____

Email Address _____

Undergrad Major _____ GPA _____ Institution _____

Other Degrees _____ GPA _____ Institution _____

_____ GPA _____ Institution _____

Please provide the number of semester hours you have taken in the following areas:

Organic Chemistry _____ General Biology _____ Microbiology _____

Highest level math course (please give name of course) _____

GRE: Verbal _____ Quantitative _____ Analytical _____

Thank you for your interest in graduate programs within the Department of Environmental Health Science (EHS). The EHS Department offers a Master of Science in Environmental Health, and through the UGA Interdisciplinary Toxicology Program, a Master of Science and Ph.D. in Toxicology.

Please provide a brief narrative for the following categories. You must keep your answers within the space provided.

How will a graduate degree in Environmental Health or Toxicology help you obtain your career goals?

Briefly describe the courses which have prepared you for the graduate programs in Environmental Health or Toxicology.

Briefly describe your work experience related to the field of Environmental Health or Toxicology.

This may include such items as internships, lab experience, work environments, etc.

State your research areas of interest in the graduate program in Environmental Health or Toxicology.

Prospective students are encouraged to initiate contact with faculty members whose research interests overlap with their interests and career goals. You should browse the biographical sketches of EHS faculty (<http://www.uga.edu/ehs/people/faculty.html>) and learn about their research interests and current projects. Graduate students conduct research under the guidance of a faculty member in the department while completing a curriculum of required and elective courses. To the extent possible, graduate students are supported in the form of a graduate assistantship. An assistantship grants the student a tuition waiver and a monthly stipend. Students with assistantships provide service to their advisor through a combination of research and teaching activities. Typically, assistantships are funded by research projects directed by individual faculty members. Limited support may be provided by the department in the form of teaching assistantships. In these cases, students assist with laboratory sections or other aspects of an EHS class.

Based on your initial review, which EHS faculty member(s) are you most interested in working with?

Prospective students are invited to contact Dr. Phillip Williams, the EHS Graduate Student Coordinator, at pwilliam@uga.edu for an introduction to graduate programs in the Department of Environmental Health Science.

Please submit your completed form to:

Graduate Coordinator
Department of Environmental Health Science
The University of Georgia
206 Environmental Health Science Building
Athens, GA 30602-2102

Additional Information Required:

Along with your Statement of Interest Form, please send the following information to the Department of Environmental Health Science.

CV/Résumé

Three letters of Recommendation

*Please provide the following information for your references.
